

What can **businesses** learn/unlearn from the experiences of **climate change**?

Learning by the intersection of thoughts

Inspired by Frans Johansson's *The Medici Effect* which shows how breakthrough ideas most often occur when we bring concepts from one field into a new, unfamiliar territory and offers examples on how we can turn the ideas we discover into path-breaking innovations.

Also inspired by people like people like Dr. Satish Dhawan, Dr. Abdul Kalam and mystics like Kabir Das who gave enormous insights into the fields that were beyond their "Domain". How can we learn from the experiences of the real events happening around us? How do we grow beyond the perceived status quo?

Purpose and expected benefits:

- * Inject fresh thinking into our professions
- * Understand the significance of our role as Individual contributors and leaders
- * Understand, appreciate and execute good ideas
- * Understand that domain knowledge is not a limiting factor to growth
- * Growing beyond the Constant
- * Develop Courage to persevere innovation

A quick 3 hour workout followed by personalised sounding board sessions
